DETAILED ACTION

1. This restriction is in response to the application filed December 3, 2001.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9, drawn to a semiconductor structure for circuit substrate in which an interlayer connection is implemented via an interstitial via hole, classified in class 257, subclass 773.
 - II. Claims 10-12, drawn to the method of manufacturing a semiconductor structure for circuit substrate in which an interlayer connection is implemented via an interstitial via hole, classified in class 438, subclass 618.

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Michael E. Fogarty on June 5, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2822
